Subject: Ethylene Oxide

Tonya,

I just sent a link to the external SharePoint site that houses the EtO updates. Let me know if you have difficulty accessing the SharePoint site.

Please review and let me know if you have any comments by COB Tuesday, April 16, 2021. Most of the language is boilerplate, except the particulars about the actual facility. These are highlighted in yellow.

Also, EPA is asking if you can expedite the reviews for the Emissions Inventories associated with the four EtO facilities on the OIG list – Indorama (formerly Huntsman Port Neches), Midwest Sterilization - Laredo, Shell Research Facility – Houston, and Texas Eastman. We appreciate the work you continue to provide on the EtO activities.

Fran
